

MST03M

REMOTE CONTROL - MST03M

MST03M video picture transmission system allows to make control stations for remote control systems by using the analogic telephone trunk lines (PSTN) with a RJ11 connector. The basic system is composed by two MST03M units, one as control station, one as video signal acquisition. It allows to control up to three cameras. The system can be expanded up to 10 by the connection of MST08E. It's possible to display the images by a standard TV set (with A/V SCART plug). Out of production.

CARATTERISTICHE PRINCIPALI

materiale: **metal**

colore: **black**

ingressi: **3**

uscite: **1**

FUNZIONI

CARATTERISTICHE TECNICHE

tensione di alimentazione: **12 Vdc**

assorbimento massimo di corrente: **12W**

DIMENSIONI

peso kg **1,1 kg**
