XE2922

Expansion board for Bluetooth - XE2922

Internal bus expansion board, allows integration of **Bluetooth technology** in the door stations Alba or Hero series for easy system programming via "DUO System" app. It allows access control simply via smartphone with dedicated apps (Farfisa Smart Access and Farfisa Smart Dial), available for free on App Store and Play Store. With **Farfisa Smart Access**, you can open the lock via virtual keyboard and personal numeric code or with a simple screen touch, in case the smartphone has been previously associated with the device. It can be used as an alternative to the proximity reader module. As regards **Farfisa Smart Dial** the smartphone acts as door panel to effect the call, in order not to get in touch with external stations. Both apps are part of the **"notouch / nocovid-19" project** with which solutions are offered in order to contain the covid-19 pandemic.

CARATTERISTICHE PRINCIPALI

FUNZIONI

CARATTERISTICHE TECNICHE

tensione di alimentazione: **by the Duo bus**

assorbimento massimo di corrente: **10 mA if working**
